PROFESSIONAL SUMMARY

Second-year Computer Software Engineering student and Backend Development Intern at ByteCorp Technologies, building a production-style Django REST Framework job board backend with JWT authentication and role-based access control. 15+ open-source projects across Python/Django, Java, C#.NET, and JavaScript, including an AI-powered resume analysis platform (ResumeAI).

EDUCATION

Bachelor of Engineering in Computer Software Engineering - Sep 2024 - Sep 2028

Bahria University - Karachi Campus

EXPERIENCE

Backend Development Intern (Remote) - June 2026 - Present (3 Months)

ByteCorp Technologies - Training Program

- Building a production-style Django REST Framework job board backend: PostgreSQL schema/ERD, JWT authentication (15-min access / 7-day refresh), and role-based access control across 3 roles with ownership checks.
- Currently implementing strict validation (Section 8) across all five modules; passed a technical viva on REST API design, JWT authentication, and RBAC + ownership authorization.

Java Development Intern (Remote) - 2026

AICTE Oasis Infobyte Internship Program (OIBSIP) - Java Development Track

- Completing a 5-task Java internship track; built an ATM Interface (Java OOP, ArrayList) and an Online Examination System (Java Swing, timer-based test flow).

Software Development Intern (Remote) - 2024

CodeAlpha - Project-Based Internship

- Delivered two production-quality Java applications (Student Grade Manager, Hotel Reservation System), later adopted as reference implementations on the internship platform.

PROJECTS

ResumeAI | FastAPI, Next.js 15, TypeScript, PostgreSQL, JWT, OpenAI/OpenRouter API, Docker | GitHub

- Built a production-ready AI resume analysis platform with ATS scoring, skill-gap analysis, and job matching; 18+ REST API endpoints, JWT auth, and Docker Compose deployment.

FoodHeaven - Restaurant POS System | Python, Django REST Framework, PostgreSQL, JavaScript, PyWebView | GitHub

- Built a native desktop POS system with real-time cart management, GST calculation, Kitchen Monitor Display, and a Chart.js analytics dashboard backed by PostgreSQL.

Food Heaven Website | HTML, CSS, JavaScript, Bootstrap 5, .NET Framework | GitHub

- Built a premium restaurant management website with a modern UI, dynamic menu display, and a robust table reservation system with responsive design across all devices.

Algo Puzzle Board | HTML, CSS, JavaScript, Data Structures & Algorithms, .NET Framework | GitHub

- Built an interactive visualization platform covering 9 classic algorithms including Dijkstra's, N-Queens, and Kruskal's MST, with animated step-by-step walkthroughs.

Requirement Genie | Python, NLP, AI/ML, Streamlit | GitHub

- Developed an AI-driven requirements engineering assistant that automates SRS document generation using NLP techniques.

Job Ranking System (SkillMesh) | Python, DSA, Greedy Algorithms, OOP | GitHub

- Built a DSA-based candidate ranking engine using skill matching, experience scoring, and greedy budget optimization, with a Max Heap for efficient top-candidate retrieval.

Decode & Discover | JavaScript, HTML, CSS, Cryptography | GitHub

- Developed an educational cryptography tool teaching core security concepts through interactive encryption/decryption visualizations and story-based learning modules.

TECHNICAL SKILLS

Languages: C#, Java, Python, JavaScript, SQL, HTML, CSS

Frameworks: Django, Django REST Framework, FastAPI, Next.js, Streamlit, Bootstrap 5, Java Swing, C# Windows Forms

Databases: PostgreSQL, MySQL, SQL Server, SQLite, Oracle

APIs & Authentication: REST APIs, FastAPI, JWT Authentication, Role-Based Access Control (RBAC), Ownership-Based Authorization

Tools & Concepts: Git, GitHub, VS Code, OOP, Data Structures & Algorithms, Design Patterns (23 GoF), SOLID, MVC

ACHIEVEMENTS

- Currently completing a Backend Development Internship at ByteCorp Technologies and a Java Development Internship under AICTE OIBSIP (both ongoing).
- 15+ open-source projects on GitHub across Java, Python, C#, and JavaScript.
